Work Experience

Fusion 360 | Draper, UT - Frontend Developer **September 2023 - Present**

- Revamped a project involving 8+ websites, by creating a new front end design for each site and enhancing user experience resulting in a seamless user-friendly web interface
- Engineered a responsive Node.js application that extracted data from a google sheet and populated content into a custom timeline component within a basic HTML file which led to higher SEO rankings
- Built and maintained 14+ websites, all stemming from collaborating and project planning with the developer and design team to meet client expectations and deadlines

Fusion 360 | Draper, UT - Software Developer Intern **July 2023 - September 2023**

- Developed skills within mobile responsive web design to ensure an exceptional experience for all users
- Engaged in furthering knowledge and expertise of writing clean and efficient code using HTML, CSS, and JavaScript which contributed to well-structured development
- Incorporated version control systems to track changes and collaborate with other developers; This ensured organized project contribution within the developer team
- Constructed clear and concise goals during the internship to improve problem solving and analytical thinking skills

Devmountain Student Developers | Lehi, UT - Web Developer Student **February 2023 - June 2023**

Key Projects:

- Workout Creator Web App | [Github Repo](#), [Recorded Demo](#) | React, HTML, CSS, Node, Postgres
 - Programmed a full stack application which utilized React.js to implement a modern and engaging experience for users; Users can save exercises, workouts, and training splits to be more organized within training implementation and schedule
- Recipe Web App | [Github Repo](#), [Recorded Demo](#) | React, HTML, CSS, Node
 - Assembled a front end focused application that allows users to create and save food recipes resulting in quick and easy access in the future
- NBA Simulation Web App | [Github Repo](#), [Recorded Demo](#) | JavaScript, HTML, CSS, Express, ball don't lie API
 - Created a full stack web application for users to simulate a game of two teams made up of the NBA players chosen; This helps users in decision making while sports betting

Integrated Deicing Services | Salt Lake City, UT - Aircraft Deicer **December 2021 - February 2023**

- Performed deicing/anti-icing procedures using JBT Tempest deice trucks to remove ice and snow from all commercial and cargo aircraft
- Implemented efficient deicing strategies that led to quicker deicing procedures while still upholding all safety standards set in place
- Integrated IOS based software to record data about each deicing procedure that took place

Education

Devmountain Coding Bootcamp - Lehi, UT | graduated June 2023

February 2023 - June 2023

Full Stack Web Development

- Demonstrated a keen understanding of how to build a full stack web application by integrating front end designs with back end APIs
- Incorporated pair-programming to create and design web solutions which led to improved communication, teamwork, and collaboration skills
- Developed knowledge of modern industry standards and best practices regarding web development

University of Utah | Salt Lake City, UT

August 2021

General Studies
